Community Health Needs Assessment Plan

Summary

Title: **Adults without Access to Healthcare Services**
Product: Community Outreach Programs & Events
Operations Contacts: Board of Trustees/Kimberly Agee & Maureen Tills, Community Relations
Marketing Contacts: Matthew Gerrell & Diane Petrocelli
S.M.A.R.T. Goal: To provide health-related community services to 2,160 Brevard County residents by September 30, 2019.
Time Frame: October 1, 2016 to September 30, 2019
(FY 2017 through FY 2019)

Tactics: Health First will provide Brevard County residents the opportunity to participate or engage in health-related community services such as education programs and screenings.

Background Information: Data obtained from the Community Health Needs Assessment, conducted by Professional Research Consultants (PRC) in Spring 2016, identified adults without access to healthcare services as a disparity.

S.M.A.R.T. Goal:

To provide health-related community services to 2,160 Brevard County residents by September 30, 2019.

Audience:

Adults without access to healthcare services are provided opportunities by Health First to participate or engage in health-related community services such as education programs and screenings.

Messages:

1. Residents of Brevard County can achieve better health when they have access to healthcare services. Education and screenings are key to wellness.
2. Health First will provide opportunities to participate or engage in health-related community services such as education programs and screenings.

Call to Action:

Patients without access to healthcare services will be provided with opportunities to participate or engage in health-related community services such as education programs and screenings.
