

Trauma Nursing Core Course (TNCC) 2019

TNCC is a two-day standardized course, providing the learner with core-level trauma knowledge and psychomotor skills associated with implementing the trauma nursing process. TNCC teaches a systematic approach for the care of the injured patient.

The course includes new mandatory pre-course online modules: Bariatric Trauma Patient, Interpersonal Violence Patient, Older Adult Trauma Patient, Pregnant Trauma Patient, Biomechanics, Kinematics and Mechanisms of Injury.

TNCC may be officially attended by registered nurses (RN) but may be audited by other medical personnel. It is strongly recommended that the participant have at least six months of clinical nursing experience in an emergency care setting. It is assumed that the course participant possesses generic nursing knowledge, has an understanding of emergency care terminology, and is familiar with standard emergency equipment.

This program has been approved by Emergency Nurses Association (ENA) for a total of 17.65 contact hours, which includes 2.24 contact hours for the pre-course online modules. ENA is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission of Accreditation.
